Delphi 10.3.3 is Available (/blog/2019-november-delphi-10-3-3-available.html)

Embarcadero today has officially released the version 0.3 Rio Release 3 of RAD Studio, including Delphi and C++Builder

---

I've very happy to see the official release of Delphi 10.3.3, which is primareily focused on adding the Android 64-bit platform to the product, so you can publish again any application to the Google Play Store (also thanks to the new support for the Android App Bundle format).

You can find more information about this release at the following links:
